

## COMMISSION 19: ROTATION OF THE EARTH

(*ROTATION DE LA TERRE*)

### ANNEX TO THE REPORT 1999-2002: REFERENCES

#### Electronic Publication only

#### 1. Publications related to IERS

##### 1.1. Earth Orientation Centre

Gambis D., 2001: Allan Variance analysis applied to Earth Orientation Analysis, *Adv. Space Research*, vol 30, 2, pp 207-212.

##### 1.2. Rapid Service Centre

Luzman, B.J., 1991b, Prediction of Earth Orientation, *Bulletin Geodesique*, 65, 18.

McCarthy, D.D. and Luzum, B.J., 1991a, Combination of Precise Observations of the Orientation of the Earth, *Bulletin Geodesique*, 65, 22.

McCarthy, D.D., 1996, IERS Conventions, IERS Technology Note, 21 Paris Observatory

Stammer, D., R. Tokmakian, A. J. Semtner, C. Wunsch, How well does a 1/4 degree global circulation model simulate large-scale oceanic observations?, *J. Geophys. Res.*, 101, 25779-25811, 1996.

Fujita, M., B.F. Chao, B.V. Sanchez, and T.J. Johnson, 2002, Ocean Torques on Solid Earth and their effects on Earth rotation, accepted with revisions, *J. Geophys. Res.*, 107, B8.

Johnson, T.J., C.R. Wilson, and B.F. Chao, 2001b Non-tidal oceanic contributions to gravitational field changes: Predictions of the Parallel Ocean Climate Model, *J. Geophys. Res.*, 106, B4.

Johnson, T.J., C.R. Wilson, and B.F. Chao, 1999, Oceanic Angular Momentum Variability Estimated From The Parallel Ocean Circulation Model, 1988-1998, *J. Geophys. Res.*, 104, B11.

Johnson, T.J, Luzum, B.J., and Ray, J.R., 2002, Improved near-term UT1R predictions using forecasts of atmospheric angular momentum, *J. Geodynamics*, in review.

Johnson, T.J., P. Kammeyer, and J. Ray, The effects of geophysical fluids on motions of the Global Positioning System satellites, *Geophys. Res. Lett.*, 28(17), 3329-3332, 2001.

Kammeyer, P., A UT1-like quantity from analysis of GPS orbit planes, *Celest. Mech. and Dynam. Astr.*, 2044, 1-32, 2000.

Luzum, B.J., J.R. Ray, M.S. Carter, and F.J. Josties, 2001, Recent improvements to IERS Bulletin A combination and predictions, *GPS Solutions*, 4(3), 34-40, 2001.

Ray, J.R., Towards an integrated global reference system: Geodesy as a utility, in Towards an Integrated Global Geodetic Observing System (IGGOS), R. Rummel, H. Drewes, W. Bosch, and H. Hornik (eds.), International Association of Geodesy Symposia, vol. 120, Springer, Berlin, 19-21, 2000.

Ray, J.R., New timing products from the IGS: IGS/BIPM time transfer pilot project and UT1-like estimates from GPS, in IVS 2000 General Meeting Proceedings, Koetzing, Germany, N.R. Vandenberg and K.D. Baver (eds.), NASA Publication CP-2000-209893, 289-295, 2000.

Mireault, Y., J. Kouba, and J. Ray, IGS Earth rotation parameters, GPS Solutions, 3(1), 59-72, 1999.

### 1.3. ITRS Centre

Altamimi, Z., D. Angermann, D. Argus, G. Blewitt, C. Boucher, B. Chao, H. Drewes, R. Eanes, M. Feissel, R. Ferland, T. Herring, B. Holt, J. Johansson, K. Larson, C. Ma, J. Manning, C. Meertens, A. Nothnagel, E. Pavlis, G. Petit, J. Ray, J. Ries, H-G. Scherneck, P. Sillard, and M. Watkins, 2001, The terrestrial reference frame and the dynamic Earth, Eos Trans. AGU, 82(25), 273,278-279.

Sillard, P. and C. Boucher, Review of Algebraic Constraints in Terrestrial Reference Frame Datum Definition, Journal of Geodesy 75, 63-73, 2001

### 1.4. GGFC

Chao, B. F., V. Dehant, R. S. Gross, R. D. Ray, D. A. Salstein, M. M. Watkins, and C. R. Wilson, Space geodesy monitors mass transports in global geophysical fluids, EOS, Trans. Amer. Geophys. Union, 81, 247-250, 2000.

[SB Core] Core Dynamics, structure, and rotation. eds. V. Dehant, K. Creager, S. Karato, S. Zatman, AGU monograph, 2002, in press, and articles therein
